

ANNOUNCEMENT FOR IMMEDIATE RELEASE

July 1, 2018

Author launches the manuscript of his new science fiction adventure and mystery, *The Orb, the Link and the Library*, into outer space.

D.M. Rosewood, a science fiction writer, is the first author in history to fly his original manuscript into outer space before publication. Launching a book normally involves creating, writing and promoting the publication of a new book here on Earth, but this creative author has done something no one else has ever done in the history of writing - having an extraordinary spaceflight company launch the manuscript of his new book into outer space and return it to Earth to be published for his readers. The author confirmed that the manuscript of *The Orb, the Link and the Library* flew into outer space, the region of space where the Earth's atmosphere can no longer sustain normal aerodynamic flight, defined by the famous aeronautical engineer, Theodore von Kármán, as an altitude at or above 98.5-99.5km. Now that's a book launch that will be long remembered!

The author writes about this exciting 'first':

"Since the beginning of time, over 108 billion humans have lived on the surface of our planet and almost 7 billion live here today. But, only a few more than 550 people have ever left earth and ventured into space, and only ~60 of these were women. Now, my readers can hold in their hands the story whose original manuscript and digital text were flown into space and returned to Earth to be published for them. As they become absorbed in this series that takes its readers on an intriguing journey deep into the cosmos, I hope this story will ignite a lifetime of passion for space exploration and space travel. Finally, I hope the journey of my characters brings the wonders of the universe to the doorstep of my readers, realizing it's not just space that's interesting; it's about what's out there waiting for us."

Find *The Orb, the Link and the Library* at Amazon for preorder, Apple iTunes or request it from your favorite bookstore or library. Publication date: August 8, 2018.
